Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13,14,18-24,27-29, 31 are rejected under 35 U.S.C. 102(e) as being anticipated by USP 4,705,547 (Rotola et al.).

Rotola et al. discloses an upright vacuum cleaner comprising a housing 15, a drawer like pull out 12 comprising a dust chamber which receives a dust separator in the form of a bag (not shown) insertable between both of a connecting stub pipe 27 which connects to a suction hose 31 and suction pipe 30 and a suction opening 17 of a motor/fan unit 16. The drawer 12 includes coupling member 26 which couples the dust bag separator with the stub pipe 27, The drawer has projecting fingers 52,62 which are held in detents 70, an actuating element 76 arranged at the grip 35, and resilient biasing element 55 in the form of springs hold and release the drawer 12 from the housing 15. When the vacuum rests such that the grip 35 oriented upright the pull out is arranged above the motor/fan unit 16. In changing the dust separator (filter bag) a user would slide out the drawer 12 remove the bag from connection to the stub pipe 27.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 17,26, are rejected under 35 U.S.C. 103(a) as being unpatentable over USP 4,705,547 (Rotola et al.).

Making openings in a vacuum housing airtight so as to increase the suction force into the dust separator is considered to be conventional within the art and obvious to incorporate into the cleaner of Rotola et al.

Allowable Subject Matter

Claims 15,16,25,30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
